

LC-70LE732U

**AQUOS**

Overview

With the introduction of the 70-inch class (69.5" Diagonal) LC-70LE732U, Sharp once again reinforces its leadership in LCD and LED technology. Sharp's proprietary quad pixel technology adds a fourth color, yellow, to the traditional RGB pixel format, enabling many colors to be displayed for the first time. Featuring more colors than any other television, see never-before-seen colors like sparkling golds, Caribbean blues and sunflower yellows. On the LC-70LE732U, this technology is enhanced further with Quad Pixel Plus, which produces smoother lines by enabling the individual control of all 8-million sub-pixels on the screen.

The proprietary AQUOS LED system comprised of the X-Gen LCD panel and UltraBrilliant LED enables an incredible dynamic contrast ratio of 6,000,000:1 and picture quality that is second to none. 120Hz Fine Motion Enhanced virtually eliminates blur and motion artifacts in fast-moving video. The LC-70LE732U is fully featured, including Vudu™ apps, Netflix streaming video, and CinemaNow video, along with the industry's leading online support system, AQUOS Advantagem Live. And, with built-in WiFi, connecting is easier than ever.

Features

- ▶ Full HD 1080p (1920 x 1080) Resolution - with more than 8 million dots for the sharpest picture possible.
- ▶ Quad Pixel Plus - enables the processing of images with higher resolution and less jags in diagonal lines.
- ▶ Quad Pixel Technology - RGBY filter adds yellow to the traditional RGB sub-pixel components, enabling the display of many colors never before seen on TV.
- ▶ UltraBrilliant LED system - includes a unique "double-dome" light amplifier lens and multi-fluorescents, enabling high brightness and color purity.
- ▶ Full HD 1080p X-Gen LCD Panel - is designed with advanced pixel control to minimize light leakage and a wider aperture to let more light through, providing the industry's highest contrast level.
